## Hello Community,

the OpenStreetMap-project, which provides the data AndNav2 is based on, could need your help.

In 2008 there was a huge import of 

US government map-data, called "TIGER"-data. There were so many streets that they could not be imported manually and a batch-script was used. Unfortunately in some cases the data needs some tiny manual improvement that can only be done by a helping hand, that could be **y**  
**ou**

...
