

Hello Community,

today we proudly announce the first **public AndNav2-Alpha** for the following Countries:

- Germany, France, Denmark, United Kingdom, Spain, Switzerland, Italy, Austria & Ireland

- 

- Why no US-coverage? Because we need a server! We are fundraising for it!

Please keep in mind that this version is still **Alpha** and therefore might crash. Also the servers might take a short break from time to time.

You can download the *.apk directly from your Android Device, from this link:
