

Hello Community,

today I fixed two bugs, where it i.e. was not possible to set the Home-Location from POI/Contacts/Favorites. Thanks to the busy reporters 🙏

Also I added autocompletion for the searchbox in the 'WhereAmI?'-Screen. (Taken from the previously entered POIs)

Best Regards,
Nicolas

Full changelog after the break...

#####

0.9.2.2 --> 0.9.2.3

#####

Added:

- WhereAmI-Searchbox now has autocomplete with previous typed POIs

Updated:

-

Fixed:

- UK-Postcode Activity now has proper descriptions on malformed postcodes
- Home-Location can now be properly chosen from POI/Contacts/Favs
- ABC-Keyboardlayout is now back default
