Hello all,

I did a crappy mistake on the initial AndNav1 - Beta2 release.

When your version (0.9.2.1) is not showing any map-images, please update from the market! 📱

I'm sorry for the inconvenience. 🙏

[Update]

The Home-Location can currently not be taken from POI/Contacts/Favorites. A fix is ready and will go out tonight! (Nov. 10th 2008)

[/Update]

Best Regards,
Nicolas
