

Hello Community,

as promised we are working night and day on new features for AndNav.

From today on, your search is no more limited to streetnames! You now can specify your search down to housenumbers / streetnumbers!

Great work Christof & Pascal 

The only **limitation** with this functionality is that **not all** street in the [openstreetmap](#) -data were tagged with housenumbers!

See this sample, having searched for:

- Bokel Agathastrasse 4

- Bokel Agathastrasse 10

Streetnumbers / Housenumbers in AndNav2

Written by Nicolas Gramlich

Thursday, 15 January 2009 18:10 - Last Updated Monday, 19 January 2009 06:17

Searching for streetnumbers within AndNav2 will be re-enabled with the next version.
By clicking on a house number, choose the house number from the list and zoom in as close as possible.
