Hello Community,

today we want to make you familiar with the Weather Forecast and the Accessibility Analysis.

The **Weather Forecast** gives you a 4-day weather forecast to any point on the map you are currently looking at. You can see the condition (sunny, cludy, rain, snow, ...) plus the minimum and maximum temperature of the day.

The **Accessibility Analysis**, as described in an earlier news-post, answers the 'Where can I get in X minutes?'-question.

...enjoy 😊

□ For your information: The Weather-Forecast is available in both, AndNav¹ and AndNav2. The Accessibility is only available in AndNav2.

Best Regards,

Nicolas
