Hello Community,

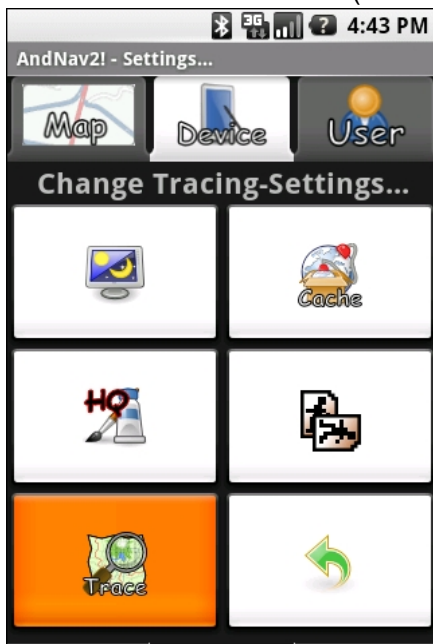

today we want to make you familiar with a new setting of AndNav2 (when I find the time, also of AndNav1), the

Trace-Policy

While AndNav is running, it records traces of where your device has moved. From the next update on, you have the possibility to choose what is done with these traces. You can choose from one of the following:

1. Anonymously(!) upload *zipped* to andnav.org. (*gets sent to the openstreetmap-project after filtering*)
2. Directly upload to your openstreetmap.org-Account.
3. Store *zipped* to your SD-Card, if inserted. (*Folder: /andnav2/traces/1234567890.gpx.zip*)

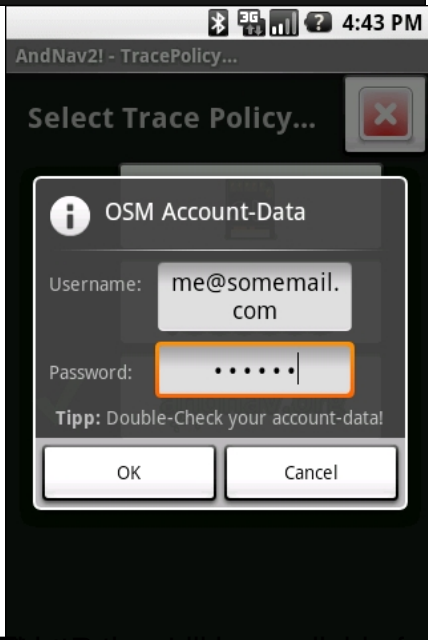

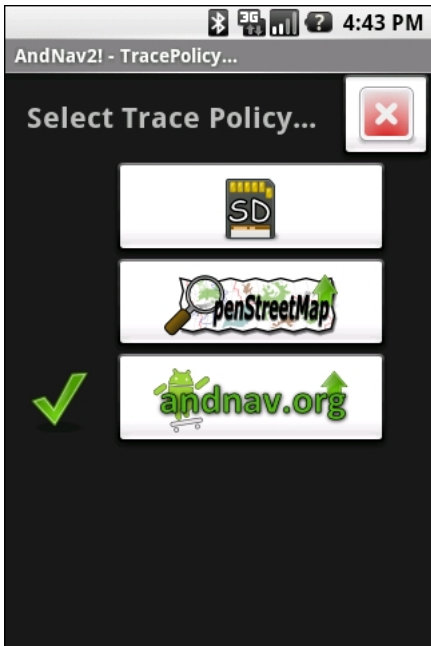

This is how it looks like. (Menuitem --> Options --> Entering OSM-Account-Data)

Introducing the Trace-Policy

More options will be available from the very next update of AndNav2.
