There are no translations available.

Hello Community,

we proudly announce that AndNav2 is now supporting California one of the biggest states in the United States of America.

We decided to provide this kind of 'US-preview' to you, to show what would be possible if we had the money for the server, which we are fundraising for.

Why California?

1. Because most money was donated from this state
2. ~30 People place themselves to California on the [Community-Map](#)

California here we come...

What else... from this release on you can search through **all existing POIs**

of the

OSM-Database

, which are several hundredes of thousands!

Also you have the possibility to add Traffic-Feeds to AndNav2 as described earlier in the news.

You can download the **Nightly-Build** here: [»Download«](#) (can be called from your G1)

Best Regards,
Nicolas
