# Hello Community,

today we want to make you familiar with a new feature of AndNav2, the Accessibility-Analysis. The Accessibility-Analysis is a service that gives you information about:

*'Where could I get within X minutes?'*

Its great if you robbed a bank and want to get the hell out of there 🤪  
A really serious and really theoretical usecase would be: A virus starts spreading in town X, how far has it spread in Y minutes?!

This is how it looks like on a G1:

Stay tuned for a soon AndNav2 - Public Alpha!

Best Regards,  
Nicolas
