

## Hello Community,

in order to receive 100% free alpha/beta - versions of AndNav2! [register](#) here on andnav.org and put yourself to the

[Community-User-Map](#)

(Set your location under Profile-->Personal).

Then I will notify you through the mail you are registered here and send you the latest alpha/beta apks of AndNav2 !

### Important Notes:

- **Countries currently**<sup>Nov 15th 2008</sup> **covered are:**
- Germany, Switzerland, Austria, Italy, Denmark, Liechtenstein, UK and Ireland
- Next week there will be Spain and France too !
  
- The applications you receive do not represent the final product! Especially bugs are meant to be fixed in a final version!
- The Routing of AndNav2 **may currently be partially wrong!**
- The Reason for that is because the [OSM](#) -data is a community-based project and as we know nobody is perfect! So it might turn out that there is a one-way not recognized, a roundabout unknown, or a turn-restriction untreated!
- We are working really hard on getting such things improved.

### FAQ: Why isn't it on the market?

- Especially the Alpha-Versions will not be available from the market, because unfinished application is due to receive one-star ratings. And I do not want to risk AndNav2 down the lists, because of some small bugs from the Alpha/Beta-version.

### FAQ: Why isn't the US covered?

- The mapdata for the US is currently so big, that it doesn't fit on our server. Servers at that scale cost hell of money, which we don not have.

## AndNav2 - Alpha/Beta-Tester call
