

Holidays over...

Written by Nicolas Gramlich

Hello Community,

the Beta that ran out are 100% my fault... AndNav1 (on the market) and AndNav2 have been updated! (I hope I didn't make a mistake in this quick fix)

Holidays and family have taken so much time that I forgot that the Betas ran out 🙄

Also I've been on the road since Wednesday and couldn't check my mails and up a new version.

So... that means I'll work double shifts on AndNav for you in the coming weeks. From Monday on I'll be 100% (ok 200% back for AndNav 🙄)

Maybe there will soon be something about ... traffic 🙄

Best Regards,
Nicolas
