# Hello Community,

today we want to make you familiar with the so called **Route-Sharing**.

With the new Route-Sharing feature, you can easily mail a route that you have currently displayed to any of your contacts. To do so, simply open the Menu while navigating on a route and select "Mail Route".

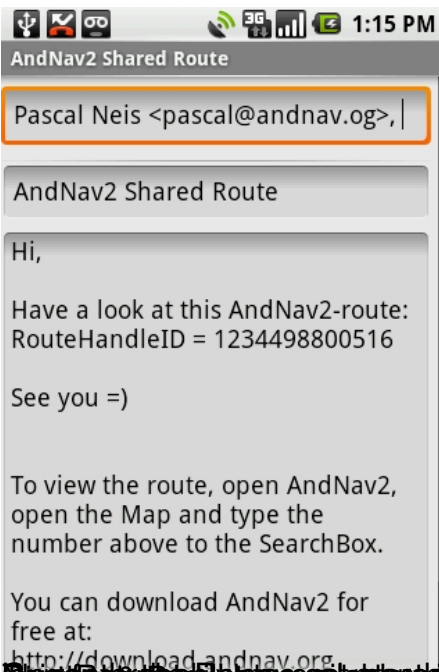

Your favorite mail application will come up with a mail like this. All you have to do is to fill the email-address (autocompleting from your contacts):
