

□ Hello Community,

good news for our 

UK-Users. We could increase the number of UK-Postcodes by a factor of 5, from

Before: 10.336

Now: 53.835

Before we were using PostCode-Data mainly from freethepostcode.org but now, suggested by 'joe' an AndNav.org-Forum-User we are now also using npemap.org.uk

Best Regards,
Nicolas
